Street Lights – Shading Policy

Effective Date:	11 August 1978
Contact Officer:	Coordinator Engineering Services
TRIM Document Number:	D02130671

Objective

To achieve consistency in dealing with requests for the shading of street lights.

Policy Statement

That applicants for the shading of street lights outside their property be informed that as such lights emit an even unobjectionable illumination and that shading would reduce the level of illumination by about 50%, the Council is unable to accede to such requests for the shading of street lights.

Minute No: 249/1978
Meeting Date: 11 August, 1978
