New pathway into REP from Department of Housing area to allow pedestrian access

This proposed lookout option to be removed.

Insert: "removal of"

Consider improvements to under utilised ESBS lookout structure

Remove the word "sealed"

New sealed pathway along Buragulong St and Doolligah Ave, for improved residential access to REP

Investigate a small lookout option with spectacular views over REP and surrounding areas subject to approvals and community feedback

Investigate main REP map sign to enhance entry and revegetate site with local provenance plant species as ESBS demonstration site

Implement bushland management priorities for protection and management of significant ESBS vegetation in this area adjacent to Munda Street

ESBS demonstration site, subject to further investigations and approvals

Investigate low impact new unsealed path as part of loop trail

Utilise existing concrete path as part of loop pathway

Separate draft Community Centre PoM to address adjacent open space and connection to REP

Investigate potential location for public toilet facilities subject to investigation and detailed design.

Investigate potential alignment of low impact gated unsealed walking track through ESBS for use on interpretive tours

Investigate weed fence to prevent seed migration down slope into valuable ESBS areas

Potential relocation site for WIRES facility

WIRES location to be moved to existing clearing, closer to RCC fenceline.

Modify lookout for improved usability and site integration

2m pathway completes trail loop, connecting Community Centre and southern part of REP

Insert: Undertake Wetland Strategy to inform future management

Undertake investigation of wetland regarding water levels / water quality and ecological values to inform future management

Revegetate open space areas with local provenance indigenous species

Interpretive signage

Improve existing lookout for usability, seating and enjoyment of wetland

Retain two existing shelters and BBQ facilities

Retain existing open green space area

Additional tree planting in picnic area for improved shade, amenity, and usability

Provide 'dog poo' bags at entry to dog-on-lead areas

Modify existing lookout to improve views to the wetland

Investigate selective removal of dead trees from wetlands

Maintain 6m wide APZ

APZ zone

10m

Gate for APZ access

Retain existing fence around bushland areas as part of site management

Improvement of large under utilised open space on Joongah Steet to south of REP wetland, providing improved public amenity, passive recreation and appreciation of wetland environment. Works include lifting level to create a mound for elevated viewing of wetland, over storey trees for shade and amenity, seating, small play area and grassy open space for informal recreation. Subject to investigation and detailed design

Replace with "sculptural landscape feature consistent with the natural values of the site"

LEGEND

- REP area
- Existing wetland (varying water levels)
- Proposed shared cycle / footpaths
- Proposed unsealed track
- Lookouts to be improved
- Areas of revegetation
- Key views
- Bushland including areas of Eastern Suburbs Banksia Scrub (ESBS)
- Maintain 4m wide Fuel Reduction Zone (Fuel Reduced Areas) (Outer Protection Zone) of the APZ
- Maintain 6m wide APZ Fuel Free Zone (Inner Protection Zone) of the APZ
