

HELP STOP BEACH POLLUTION!

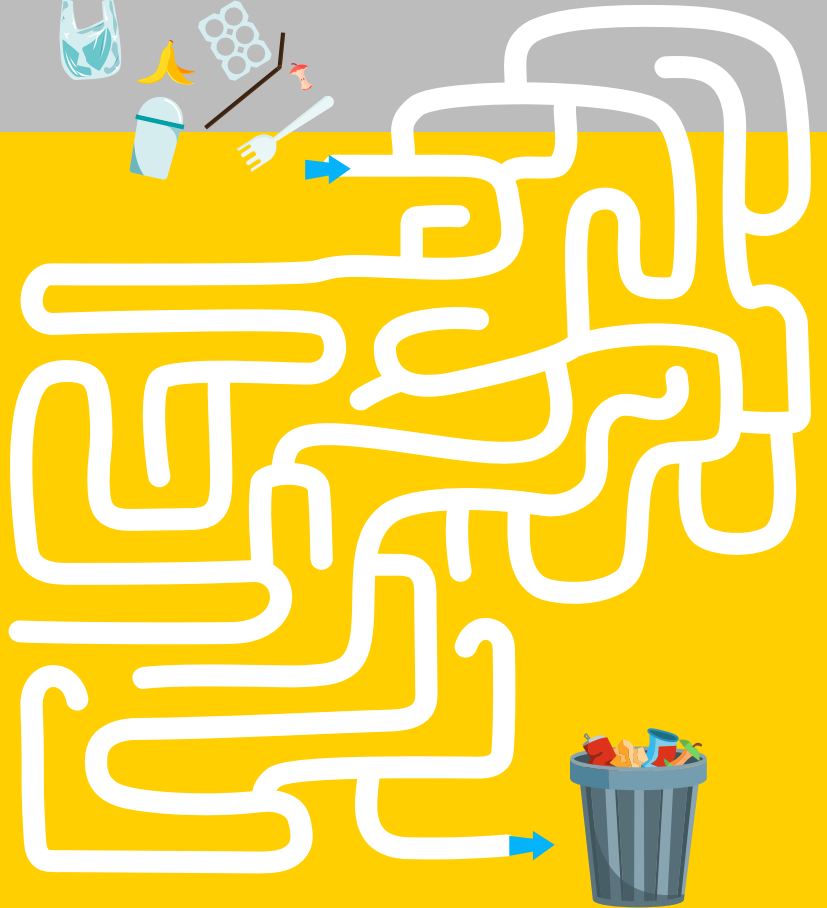

Did you know that every street in Randwick City has stormwater drains? When it rains, the water flows down the street and into the drains. Along the way the water picks up whatever is left on the street and takes it with it. These stormwater drains empty into our beaches, ponds and river systems.

BECOME A STORMWATER EXPERT!

Log onto www.endbeachpollution.sydney and research the answers to the following questions:

- 1) Name three pollutants that end up in our drains?
- 2) How many drains are in Randwick City?
- 3) How do drains help prevent flooding?
- 4) What does a Gross Pollutant Trap do? How many does Randwick City Council have?
- 5) How many kilometres of stormwater pipes exist in Randwick City?
