RE: Asbestos Air Monitoring Report

Dear Joe Santangelo

Please find below Asbestos air monitoring report for:

| Site: | Little Bay Beach |
|-----------|---------------------------|
| Location: | Background air monitoring |

All works have been completed in accordance with relevant state WHS Legislation and approved Codes of Practices.

See following pages for results.

Regards,

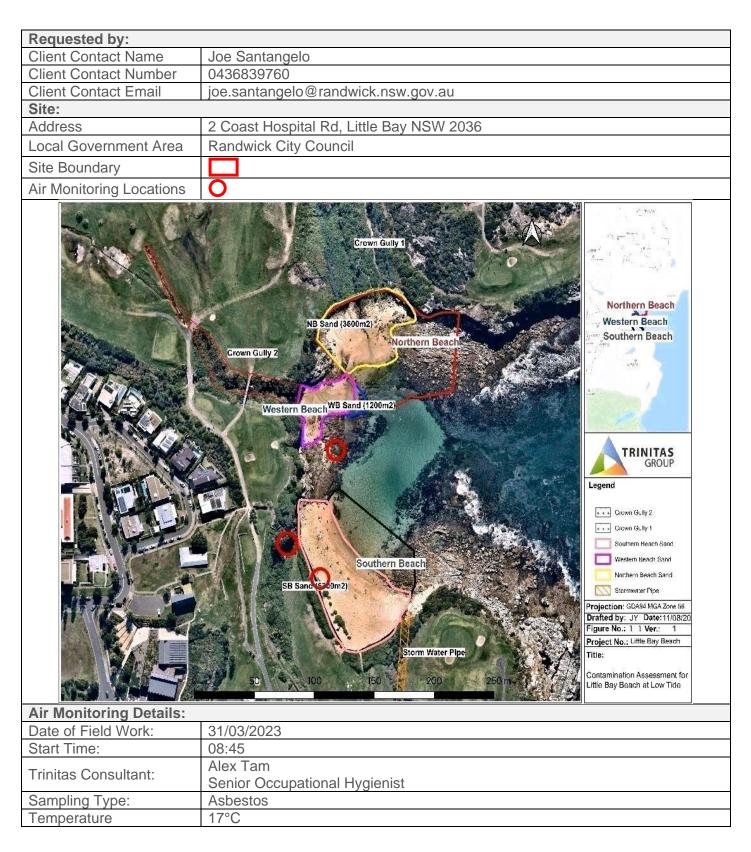

Alehm

Alex Tam Licensed Asbestos Assessor 001241 Senior Occupational Hygienist 31/03/2023

Sample History

Where samples are submitted/analysed over several days, the last date of extraction is reported.

If the date and time of sampling are not provided, the Laboratory will not be responsible for compromised results should testing be performed outside the recommended holding time.

Internal Quality Control Review and Glossary General

- 1. 2. 3.
- CC data may be available on request. All soil results are reported on a dry basis, unless otherwise stated. Samples were analysed on an 'as received' basis. Information identified on this report with the colour **blue** indicates data provided by customer that may have an impact on the results. This report replaces any interim results previously issued. 4. 5.

Holding Times Please refer to the most recent version of the 'Sample Preservation and Container Guide' for holding times (QS3001).

If the Laboratory did not receive the information in the required timeframe, and regardless of any other integrity issues, suitably qualified results may still be reported. Holding times apply from the date of sampling, therefore compliance to these may be outside the laboratory's control.

| Units | |
|---------------------------------|--|
| % w/w: | Percentage weight-for-weight basis, e.g. of asbestos in asbestos-containing finds in soil samples (% w/w) |
| F/fld F/mL | Airborne fibre filter loading as Fibres (N) per Fields counted (n) Airborne fibre reported concentration as Fibres per millilitre of air drawn over the sampler membrane (C) |
| g, kg | Mass, e.g. of whole sample (M) or asbestos-containing find within the sample (m) |
| g/kg L, mL | Concentration in grams per kilogram Volume, e.g. of air as measured in AFM (V = r x t) |
| L/min | Airborne fibre sampling Flowrate as litres per minute of air drawn over the sampler membrane (r) |
| min | Time (t), e.g. of air sample collection period |
| Calculations | |
| Airborne Fibre Concentration: | $C = \left(\frac{A}{a}\right) \times \left(\frac{N}{n}\right) \times \left(\frac{1}{t}\right) = K \times \left(\frac{N}{n}\right) \times \left(\frac{1}{t}\right)$ |
| Asbestos Content (as asbestos): | $\% w/w = \frac{(m \times P_A)}{M}$ |
| Weighted Average (of asbestos): | $\mathscr{H}_{WA} = \sum \frac{(m \times P_A)_x}{x}$ |
| Terms | |
| %asbestos | Estimated percentage of asbestos in a given matrix. May be derived from knowledge or experience of the material, informed by HSG264 Appendix 2, else assumed to be 15% in accordance with WA DOH Appendix 2 (P _A). |
| ACM | Asbestos Containing Materials. Asbestos contained within a non-asbestos matrix, typically presented in bonded (non-friable) condition. For the purposes of the NEPM and WA DOH, ACM corresponds to material larger than 7 mm x 7 mm. |
| AF | Asbestos Fines. Asbestos contamination within a soil sample, as defined by WA DOH. Includes loose fibre bundles and small pieces of friable and non-friable |
| | material such as asbestos cement fragments mixed with soil. Considered under the NEPM as equivalent to "non-bonded / friable". |
| AFM | Airborne Fibre Monitoring, e.g. by the MFM. |
| Amosite | Amosite Asbestos Detected. Amosite may also refer to Fibrous Grunerite or Brown Asbestos. Identified in accordance with AS 4964-2004. |
| AS | Australian Standard. |
| • | S) Total % w/w asbestos content in asbestos-containing finds in a soil sample (% w/w). Chrysotile Asbestos Detected. Chrysotile may also refer to Fibrous Serpentine or White Asbestos. Identified in accordance with AS 4964-2004. |
| Chrysotile COC | Chain of Custody. |
| Crocidolite | Crocidolite Asbestos Detected. Crocidolite may also refer to Fibrous Riebeckite or Blue Asbestos. Identified in accordance with AS 4964-2004. |
| Dry | Sample is dried by heating prior to analysis. |
| DS | Dispersion Staining. Technique required for Unequivocal Identification of asbestos fibres by PLM. |
| FA | Fibrous Asbestos. Asbestos containing material that is wholly or in part friable, including materials with higher asbestos content with a propensity to become |
| | friable with handling, and any material that was previously non-friable and in a severely degraded condition. For the purposes of the NEPM and WA DOH, FA generally corresponds to material larger than 7 mm x 7 mm, although FA may be more difficult to visibly distinguish and may be assessed as AF. |
| Fibre Count | Total of all fibres (whether asbestos or not) meeting the counting criteria set out in the NOHSC:3003 |
| Fibre ID | Fibre Identification. Unequivocal identification of asbestos fibres according to AS 4964-2004. Includes Chrysotile, Amosite (Grunerite) or Crocidolite asbestos. |
| Friable | Asbestos-containing materials of any size that may be broken or crumbled by hand pressure. For the purposes of the NEPM, this includes both AF and FA. It is outside of the laboratory's remit to assess degree of friability. |
| HSG248 | UK HSE HSG248, Asbestos: The Analysts Guide, 2nd Edition (2021). |
| HSG264 | UK HSE HSG264, Asbestos: The Survey Guide (2012). |
| ISO (also ISO/IEC) | International Organization for Standardization / International Electrotechnical Commission. |
| K Factor | Microscope constant (K) as derived from the effective filter area of the given AFM membrane used for collecting the sample (A) and the projected eyepiece graticule area of the specific microscope used for the analysis (a). |
| LOR | Limit of Reporting. |
| MFM (also NOHSC:3003) | Membrane Filter Method. As described by the Australian Government National Occupational Health and Safety Commission, Guidance Note on the Membrane Filter Method for Estimating Airborne Asbestos Fibres, 2nd Edition [NOHSC:3003(2005)]. |
| NEPM (also ASC NEPM) | National Environment Protection (Assessment of Site Contamination) Measure, (2013, as amended). |
| Organic | Organic Fibres Detected. Organic may refer to Natural or Man-Made Polymeric Fibres. Identified in accordance with AS 4964-2004. |
| PCM | Phase Contrast Microscopy. As used for Fibre Counting according to the MFM. |
| PLM | Polarised Light Microscopy. As used for Fibre Identification and Trace Analysis according to AS 4964-2004. |
| Sampling | Unless otherwise stated Eurofins are not responsible for sampling equipment or the sampling process. |
| SMF | Synthetic Mineral Fibre Detected. SMF may also refer to Man Made Vitreous Fibres. Identified in accordance with AS 4964-2004. |
| SRA | Sample Receipt Advice. |
| Trace Analysis | Analytical procedure used to detect the presence of respirable fibres (particularly asbestos) in a given sample matrix. |
| UK HSE HSG UMF | United Kingdom, Health and Safety Executive, Health and Safety Guidance, publication. Unidentified Mineral Fibre Detected. Fibrous minerals that are detected but have not been unequivocally identified by PLM with DS according the AS 4964-2004. |
| | May include (but not limited to) Actinolite, Anthophyllite or Tremolite asbestos. |
| WADOH | Reference document for the NEPM. Government of Western Australia, Guidelines for the Assessment, Remediation and Management of Asbestos- Contaminated Sites in Western Australia (updated 2021), including Appendix Four: Laboratory analysis |
| Weighted Average | Combined average % w/w asbestos content of all asbestos-containing finds in the given aliquot or total soil sample (%wA). |

Comments

| Sample Integrity | |
|---|-----|
| Custody Seals Intact (if used) | N/A |
| Attempt to Chill was evident | N/A |
| Sample correctly preserved | Yes |
| Appropriate sample containers have been used | Yes |
| Sample containers for volatile analysis received with minimal headspace | N/A |
| Samples received within HoldingTime | Yes |
| Some samples have been subcontracted | No |
