Randwick SCENE Magazine is written and produced by Randwick Council's Communications Team: Joshua Hay, Chelsea Hunter and Jillian Lewis. Design by Carlen Peddie, Gemma Elliott and Gavin Tso. Our goal is to inform you about Council's activities and to celebrate together, this wonderful place we call Randwick City.

Distributed to 63,000 properties in Randwick City.

Cover image:

From the Mayor Dylan Parker

Despite the fact we had an incredibly overcast and rainy summer – which felt very wintery – I'm looking forward to the coming colder months. Our community events and activations are returning to 2019 levels and it has been wonderful to get out and about and connect with people again.

From chatting with others, I get the sense that this is a shared sentiment. It's not just about seeing people face-to-face again, it's about embracing all the activities we used to do without fear of delays or cancellations. There's a freedom in that, and it's a welcome feeling.

This winter I encourage you to continue enjoying our great outdoors. The Randwick Environment Park is one of our best-kept secrets and, thanks to the new Discovery Walk that will be in place by mid-June (see page 10 for more information), there

will be even more for kids and nature-lovers to get excited about.

If you're looking to get your hands stuck in the soil, I can recommend joining one of our bushcare volunteer groups (page 8) who have created their own close-knit community that is as much about planting native and pulling weeds as it is about sharing a cuppa with each other afterwards.

As a Council, we have a lot of exciting plans and projects coming up this year, which we've outlined in our Operational Plan and Budget. Head to page 6 to find out what is coming up in the next 12 months.

I hope I get to see you at one of our upcoming events, be sure to say hello!

**Dylan Parker
Mayor of Randwick**

**SYDNEY
FILM
FESTIVAL**

AT THE RITZ CINEMAS

GOOD LUCK TO YOU, LEO GRANDE

Emma Thompson is brilliant in Sophie Hyde's (*Animals*, SFF 2019) sparkling comedy about an older woman who hires a sex worker and the unexpected relationship that blooms.

THE FORGIVEN

Ralph Fiennes and Jessica Chastain star in this blackly comic study of clashing cultures by the inimitable John Michael McDonagh (*The Guard*, SFF 2011; *Calvary*, SFF 2014).

THE PHANTOM OF THE OPEN

Oscar-winner Mark Rylance and Sally Hawkins star in this heart-warming, laugh-out-loud true story about the worst golfer to ever play the British Open.

randwick.nsw.gov.au/enews

Racism not welcome

Signs declaring racism is not welcome will be installed on prominent street poles across Randwick City beaches as part of Randwick Council's support for a Multicultural Communities Council campaign. The signs will be installed near local beaches at La Perouse, Maroubra, Coogee and Clovelly providing a highly visible and public statement that Randwick Council opposes racism.

Domestic Violence Remembrance Memorial

A memorial will be created at High Cross Park in Randwick to honour and remember those who have lost their lives through domestic and family violence. Randwick Council has for many years shown leadership in opposing domestic violence through holding public events, funding outreach services and providing temporary housing for those exiting domestic violence. An unveiling ceremony was held on National Domestic Violence Remembrance Day on 4 May 2022. The event will be held annually.

Pop-up pedal parks are back for winter

Dust off your scooters and oil up your bike chain – Randwick City's pop-up pedal parks are back this winter and with a new location. Originally commenced in 2020 as part of support for local communities during COVID lockdowns, the pedal parks initiative has since received continued support and been extended. This year from June to August, car parks at Clovelly Beach, Chifley Sports Reserve and a new site at South Maroubra Beach will be closed to cars and turned into temporary bike parks. More information will be announced soon.

Maroubra Surf Club upgrade on the cards

A new \$10M clubhouse is planned for Maroubra Surf Life Saving Club. Randwick Councillors unanimously endorsed a four-year funding strategy to knock down and rebuild the surf club with approximately 40% of the funding to be externally funded through grants and fund-raising. Maroubra SLSC is one of Australia's oldest clubs and was founded in 1906. Membership has grown 26% in the past five years with 60% of that being young people. Design work will now commence on the project with construction estimated to commence 2024/25 subject to obtaining the additional funds.

The annual mullet run has inspired artwork for the Heffron Centre.

Aboriginal artwork revealed for Heffron Centre

Maroubra's newest community sporting facility the Heffron Centre – currently under construction – will feature a unique local Aboriginal artwork inspired by the sea life and cultural practices of the local Gadigal and Dharawal clans. Indigenous artists Carmen Glynn-Braun and Dennis Golding from Re-Right Collective have developed the concept that translates the cultural practice of mullet fishing into a unique artwork that will wrap around the entrance wall and interior glass walls of the Heffron Centre. A sculptural mural featuring stingrays and representations of the coastline will also feature as a large-scale artwork on the external southern side of the building. Construction on the Heffron Centre is well underway and is scheduled for completion by the end of 2022.

Dancing in the street

There will be swinging, swaying and record playing! Thanks to a grant from the NSW State Government, we'll be closing down streets and hosting two street parties in Randwick City this June. The parties will transform Coogee Beach and The Spot into a fiesta-themed party. There will be music, roving entertainment, a family fun zone as well as performers and DJs at both events.

We hope you'll come out and support local businesses by enjoying some food and taking advantage of the extended outdoor dining areas that will pop-up for the day.

There will be something for everyone! Bring your family, kids, friends, neighbours and even your four-legged friends along to join in the fun.

Donations to flood-ravaged communities

Randwick Council sent donation of \$10,000 via GIVIT to assist flood-ravaged communities in Northern NSW as well as a selection of children's and adult's books donated by Council and the community to Lismore Library following the loss of most of their stock in the March 2022 floods. "We're so glad to be able to donate money and items that will help Lismore get back on its feet and the community to start their journey towards healing again," said Randwick Mayor Dylan Parker.

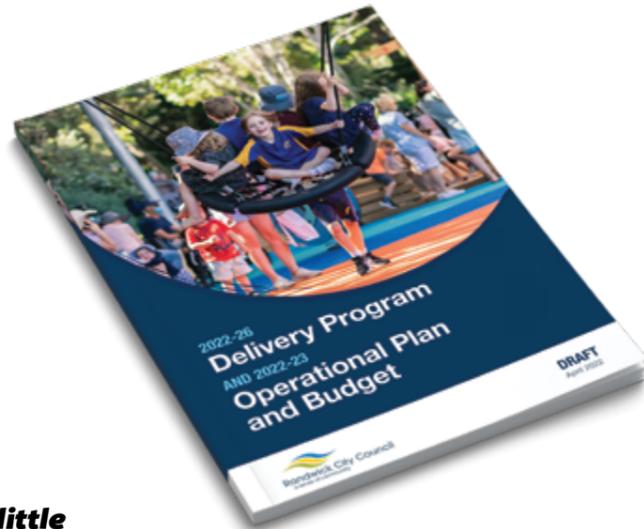

Mayor Dylan Parker with Leah Purcell

Leah Purcell honoured on walk of fame

One of Australia's leading actors, writers and directors, Leah Purcell, was inducted into the Australian Film Walk of Fame located in Randwick outside the Ritz Cinema. The proud Indigenous actor has featured in multiple theatrical performances and Australian films including *The Last Cab to Darwin*, *Jindabyne* and *Lantana* as well as the acclaimed series *Wentworth*. The induction took place on Thursday 28 April 2022 as part of the Australian launch of *The Drover's Wife* at The Ritz.

Future looks bright

Our draft Operational Plan and Budget is a little like looking into a crystal ball, it lets you know what services, projects and buildings we intend to deliver. So let's take a peek into the coming year to see what's going to be built, improved or installed near you.

The future, they say, depends on what you do today. In order to create the kind of Randwick City we want to live in, it's important that we - Council and residents - determine what that looks like and how we'll get there. That's what our four-year Delivery Plan outlines for us all; it's our agreement on what's important to us and what we believe will help us create the lives we want.

With that plan in mind, the next step is to detail how we'll get there. That's where our annual Operational Plan and Budget comes into play. It's our plan for the future and the steps we'll take today to get there.

This coming financial year, we're set to deliver a significant \$66M capital

We'll install five new EV charging stations.

works program including 6.5km of road and 3km of footpath upgrades, improvements to parks and sports fields and improved cultural and arts facilities.

"I am proud to say we've budgeted for one of the largest capital works programs ever, delivering the facilities that will add to quality of life to all Randwick City residents" said Randwick Mayor Dylan Parker.

"Maintaining high quality service levels and rolling out new infrastructure for our community to enjoy is at the heart of the Operational Plan and Budget. We're confident our plan delivers on this goal".

So what are the exciting projects that will happen over the next 12 months?

Here's an overview of the big things:

- Finishing Maroubra's Heffron Park, which will accommodate sports such as netball, basketball, badminton, volleyball and indoor futsal as well as being the new home to the Rabbits;
- Completing the Meeks Street Plaza in Kingsford;
- Improving the playgrounds at Alison Park in Randwick and Woomera Reserve in Little Bay;
- Upgrading 6.5km of road and 3km of footpaths;
- Installing new shade structures and seating at Heffron Netball courts, allowing all-weather training;

- Three new public art installations;
- Completion of the design for stormwater harvesting at Coogee;
- Rolling out five new electric vehicle recharging stations and 40 bicycle parking spaces; and
- Planting 5000 native trees and plants to improve our bushland.

Over the past three years we consulted with more than 14,000 residents who have all contributed their thoughts and feedback in a variety of ways.

This feedback – which was provided for a number of Informing Strategies as well as our 10-year Community Strategic Plan and Delivery Plan – has let us know the things we need to focus on this year. So thank you to everyone who participated in our consultations, you've helped shape our future.

We'll upgrade two playgrounds in Randwick and Little Bay.

We'll complete the design of stormwater harvesting at Coogee.

How it affects you

Council's total rates revenue is proposed to increase by 2.5%.

The domestic waste management charge is proposed to rise by 2.2% to \$637.83 per annum.

Next steps

June 2022: Council staff review submissions and report findings to the June Council meeting.

Council meeting

28 June 2022: Council considers submissions and comments and adopts final documents.

Start of delivery

2022-26 Delivery Program and 2022-23 Operational Plan and Budget will be effective from 1 July 2022.

What's happening near me?

Head to www.yoursay.randwick.nsw.gov.au to find detailed suburb snapshot documents that provide more detail about what is proposed for each suburb of Randwick City.

All-weather friends

After spending time with our bushcare volunteers it may be time to coin a new phrase: a friend in weeds is a friend indeed. Find out what it is about these weekly volunteer groups that keeps people coming back for more.

Heavy clouds have gathered over Grant Reserve in Coogee but the rain has finally stopped.

A group of women, their workout mats spread on the floor of a nearby picnic shelter, are counting down the number of sit ups until they reach zero. Next to them, standing on a sloped section of the park, are five bushcare volunteers ready to pull out the turkey rhubarb, a vigorous climbing weed that is threatening to strangle some of the native plants in the vicinity. It's hard to say who will do a more strenuous workout.

"You can work at your own pace though," assures Susan who has been a bushcare volunteer since 2002. "That's what makes this a great volunteer opportunity, you can find the patch that you want to work on, sit down or stand up, and work away at it.

You can work with others or you can have some quiet time by yourself. It's completely up to you."

Randwick Council currently has 85 volunteers who work across 12 bushcare sites, helping to regenerate and restore natural areas in Randwick City to increase the amount of native vegetation and create habitats for local birds, bees and other wildlife.

The working bee sessions, which often run for two to three hours in the morning on various weekdays as well as weekends, can include weeding, planting or mulching, depending on what the site requires. More importantly, there's morning tea at the end.

The social aspect of working in bushcare groups is a strong part of what keeps volunteers coming back year after year. "The bushcare part of

the activities usually go from about 9am to 11am but our morning tea usually ends around 12.30pm," says Susan, laughing. This is a place where genuine friendships have bloomed and been nurtured over the years.

"This is a place where genuine friendships have bloomed and been nurtured over the years."

Susan and her husband Bob often join fellow volunteers Ross and Ian on weekend-long camping trips to tend to bushcare sites in National Parks outside of Sydney, and during lockdowns in 2020 and 2021, when social lives and activities were curtailed, Marleen and Susan would meet each week for coastal walks and talks.

Morning tea is an important part of the experience.

Bob Lundy working at Grant Reserve.

Where our bushcare volunteers meet

- Clovelly Bay, Clovelly
- Fred Hollows Reserve, Randwick
- Dunningham Reserve, Coogee
- Grant Reserve, Coogee
- McIver's Ladies Pool, Coogee
- Malabar Wetland, Maroubra
- Malabar Foreshore, Malabar
- Maroubra Dunes, Maroubra
- Prince Henry, Little Bay
- Randwick Environment Park, Randwick
- Wylie's Baths, Coogee

"There has to be a reason why people keep coming back as a volunteer," says Susan. "You have to get something out of it. People don't count the number of weeds they pull, they come for the social aspect. When you have a regular group you're not talking about where do you live, what do you do, you're having deeper, more interesting conversations. We're friends, we want to know how each other is doing and what has happened this past week."

For others, such as Jessica who has arrived today to join up for the first time, and Marleen, it's a chance to reap the benefits of working outside in a garden. "I moved over from the Netherlands a few years ago and used to have a house and garden. We moved to an apartment here and I missed having a garden so I looked for an opportunity to get my hands in the dirt," says Marleen.

"I had a garden once too," says Jessica, "but not anymore because I live in an apartment. I love having my houseplants but I'm looking to learn a bit more and gain some skills for when I have a garden again."

It's not just retirees that make up this group, though many are. Students and people with flexible work arrangements also join in the activities.

"In my experience there has always been a Marleen around," says Susan. "Someone who has moved here from overseas with their spouse and has time to volunteer, and it's wonderful. They bring youth, a different culture. And now that people can work flexible hours we're starting to see more young people volunteer too. We enjoy that, it really adds to the group."

No matter whether you have 30 minutes to spare or three hours, the bushcare groups are happy to accept all comers – it doesn't matter if you can't tell a weed from a native plant,

you'll quickly learn. Even if you only have a few minutes in the morning or a lunch break spare, you'll be warmly welcomed by our bushcare groups.

Want to join our bushcare volunteers? Sign up here.

Marleen Zegerman and Susan Lundy.

Play, Learn, Explore, Preserve

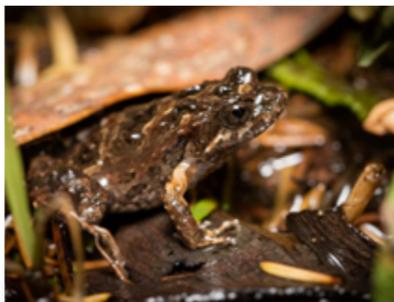

You can do it all at Randwick Environment Park. With native local frogs, a remarkable array of bird life and beautiful native flora, Randwick Environment Park should be the next stop on your list of places to visit and enjoy.

Taking up just 13 hectares of parkland, Randwick Environment Park feels like a secret when you're there. With the newly installed boardwalk, the loop around the park is accessible by all – walk, run, scoot, or push your way around as you take in the beauty of our native plants and animals.

Wetlands walkabout

The loop around Randwick Environment Park encircles an ephemeral wetland.

With the excessive rainfall we've had over the summer, this wetland has regularly held water over the past few months. However, as an ephemeral wetland, it's not unusual for it to be dry for months or even years if rain is scarce. The coming and going of the wetlands is the reason this park is so abundant. The lifecycle of the wetland provides the perfect living conditions for a variety of flora and fauna, from water dwelling to land dwelling, and everything in between.

Frog chorus

Walking around the park you'll hear a chorus of sorts, coming from the tall grasses in the wettest, lowest areas of the park. Crickets or cicadas, you might think? But you could be hearing frogs bellowing from below the bush. There are a variety of species in the park, some as small as your thumbnail, while others are as big as a tennis ball. Keep an ear out and record the sound – you can submit it to the Australian Museum Frog ID app, where you can join the Randwick City Frog Finders. Start helping to protect frogs in Randwick. Visit www.frogid.net.au to learn more.

All about the scrub

Randwick Environment Park is home to the Eastern Suburbs Banksia Scrub (ESBS), a critically endangered ecological community that we're committed to protecting. ESBS is a naturally occurring group of native plants that are influenced by local soil, water and wildlife. It can be recognised by the inclusion of specific banksias combined with a low, dense shrub layer, which makes up the main structure of ESBS. When you visit the park, look out for it – it also contains flannel flowers, sunshine wattle, coastal tea tree and more.

Bird watching is popular here.

Up with the birds

The birds at the park are incredibly diverse and for good reason! The ever-changing wetland provides the perfect hunting ground for birds of all sizes - whether they eat worms, tiny fish, moss or seeds, this environment is ideal. The low-lying native shrubs in the park provide the perfect habitat for small, native birds that like to hide in bushes and stay fairly low to the ground. While the taller trees in the park provide habitat for larger birds that fly higher above the ground and travel longer distances.

Bush regeneration

The Environment Park is vital for our local native wildlife. We use a variety of methods to support the native bushland to thrive. The use of fire plays a crucial role. Indigenous fire management practices help protect native biodiversity, while also keeping the local community safe from uncontrolled fires. Many of our native plants have adapted to regenerate after fire. Understanding the frequency and intensity of fire can help support our plants and wildlife to thrive.

Discovery at Randwick Environment Park

We're currently installing signage around Randwick Environment Park to help visitors learn all about the native plants and wildlife. There are six stations being installed, where you can stop and learn, just look for the station markers around the park. They provide numerous activities and links so you can learn how to protect and preserve the park and its wildlife. Installation should be complete by the end of June, weather permitting.

Recent rains have been great for the ephemeral wetlands.

La vie on board

The drama! The excitement! The women sneaking on board ships disguised as men! The La Perouse Museum's French Explorers exhibition has it all and so much more. Read on to find out about some of the characters featured in the exhibition and see their works for yourselves.

French Explorers – Voyages to Australia introduces some of the great 18th and 19th century French explorers who visited these shores. This exhibition celebrates one of the La Perouse Museum's key storytelling themes; European Arrivals and the French Connection. Through rare objects, archives, costumes and even a ship cabin installation, this show chronicles the personalities of the men – and women – who played a major part in the strong ongoing connections between France and Australia.

Jeanne Baret (1740 – 1807)

Voyage: 1766 – 1769, aboard Bougainville's ship *Étoile*

Jeanne Baret is perhaps one of the greatest discoveries of this exhibition. She was the first woman to sail around the entire globe in a time when Navy regulations strictly prohibited a woman from boarding a ship.

Baret was a botanist in her own right but was also the housekeeper, nurse and lover of botanist Philibert Commerson. Commerson was invited by Louis-Antoine de Bougainville to join his 1766-69 expedition but was in poor health. Unable to join him aboard as his nurse, she dressed as 'Jean' and became Commerson's male assistant instead.

There are differing accounts on how she was discovered. Some say she was immediately recognised as a

See the recreation of a ship's cabin at La Perouse Museum.

woman by the Tahitians while others report the sailors had suspected her for some time and forcibly stripped her while ashore at Papua New Guinea. Either way, by the time the expedition passed through Australia's Great Barrier Reef and reached Mauritius in 1768 her identity was known to de Bougainville. As commander, he must have been relieved to escape official censure from France when she and Commerson decided to remain on the island. Commerson died in 1773 and Jeanne returned to France the next year, thus completing her full circumnavigation of the globe.

Joseph-Antoine Raymond Bruni d'Entrecasteaux (1737 – 1793)

Voyage to Australia: 1791 – 1793 on *La Recherche* and *L'Espérance*

Joseph-Antoine Raymond Bruni d'Entrecasteaux was appointed by the French Assembly in 1791 to find what had happened to Lapérouse. This heralded a legacy of French explorers trying to solve one of the greatest mysteries in French maritime history.

Some of the great successes of his voyage were in botany and cartography. The hydrographer Beautemps-Beaupré produced maps and charts that were so finely

detailed they later were used by the English, and the naturalist Labillardière identified and collected nearly one hundred plant species previously unknown to France.

Their search for Lapérouse, however, was unsuccessful. D'Entrecasteaux actually passed within a few kilometres of Santa Cruz and Vanikoro, where Lapérouse's ships were smashed to pieces, but rising conflicts amongst the crew cut short the search and turned him north instead. Sadly, D'Entrecasteaux's expedition ended in tragedy. He died of scurvy off New Guinea with no news of Lapérouse and the expedition eventually broke up in Java as tensions between the royalist officers and republican crew reached boiling point.

François Péron (1775 – 1810)

Voyage to Australia: On Baudin's 1800 – 1804 Expedition

Charles-Alexandre Lesueur (1778 – 1846)

Voyage to Australia: On Baudin's 1800 – 1804 Expedition

François Péron was the leading scientist on the Baudin Expedition. He collected some two and a half thousand species on the voyage; one of the greatest achievements in scientific history.

Péron's zeal for anthropology, hydrographic surveys, natural history and zoology saw him and Charles Lesueur collect and catalogue over one hundred thousand specimens of plant and animal life that were new to France. In fact, he was so enthusiastic for scientific exploration he regularly got lost on expeditions – a habit that annoyed Baudin greatly. "This is the third escapade of this nature that our learned naturalist has been on," Baudin

wrote in his diary, "but it will be his last, for he shall not go ashore again unless I myself am in the same boat." Sadly, Péron died in 1810 before he could fully catalogue his huge collection.

Charles-Alexandre Lesueur originally joined Baudin as a gunner, but soon became the expedition's illustrator and artist after a mass desertion in Mauritius. He worked closely with Péron and was responsible for nearly all the expedition's natural history sketches and drawings. Lesueur eventually became an accomplished naturalist in his own right and in his later life spent twenty years travelling in America where he served as curator at the Philadelphia Academy of Natural Sciences. He died in 1846.

The artworks in this exhibition's cabin gallery are the published prints adapted from Lesueur's talented hand. The desk belongs to Péron, reimagined as if he had stepped away for a moment on another collecting escapade.

Rose de Freycinet (1794 – 1832)

Voyage: 1817 – 1820, aboard her husband's ship *L'Uranie*

40 years after Jeanne Baret comes another remarkable woman in maritime history. Rose de Freycinet secretly boarded her husband's ship *L'Uranie* and recorded her experiences in various letters and journal entries, which were eventually published.

Rose married the naval officer Louis Claude de Saulces de Freycinet in 1814. In 1816, Freycinet's proposal to command the first scientific global circumnavigation since Baudin was accepted by the French Navy. Determined not to be separated, the devoted newlyweds hatched a plan to smuggle Rose aboard dressed as a man.

Unlike Jeanne, Rose had the support of the commander of the voyage; her husband Louis. Her deception did not last long and soon became public knowledge. Though she disobeyed Navy regulations, the *L'Uranie* did not reach a French port for more than a year and so the Navy was unable to discipline them both. The public, on the other hand, was delighted with the romance of her story.

Her private correspondence to her dear friend Caroline de Nanteuil was eventually published in 1927, giving a uniquely personal insight into her adventures. After nursing her husband through a cholera outbreak in Paris, she herself succumbed in 1832.

Exhibition continues until

Clothes similar to this would have been worn by many who set sail.

Malabar memories

Cliff, Dot and Bill the dog. Malabar 1920s.

In 1925, Dot Horne's family moved from Punchbowl to Malabar. In this fascinating account, she recalls growing up in Malabar almost 100 years ago during the depression. Despite many challenges, she has fond childhood memories of a simpler time when Malabar was very different.

I remember crying when I had to leave Dorothy (her friend in Punchbowl where she was born) but dad and mum had bought a mixed business at Long Bay (now known as Malabar) as there were signs of the Great Depression starting and the building trade was starting to feel the pinch.

In hindsight I think Dad had a good feel for the right thing to do at the right time. So again, using considerable courage in my opinion, he moved from his comfortable life in the building game and left Henry Street to make a complete career change to buy the shop in Dacre Street.

At that age memories are short so the sadness of leaving the security of Henry Street was short lived after moving to a new area and finding myself only feet from the water's edge.

Life was very simple; we didn't have many toys and didn't really need any as we made our own fun, like sliding down an embankment onto the beach on a chaff bag. This was very popular.

My brother, Cliff and I would sit and play with dolly pegs joined together and made soldiers of them going to war. We loved washing days and mum would let us bathe in the water that she had boiled the clothes in. It was great fun and it was very soapy and slippery. That was our once-a-week bath. The rest of the week mum would wash us in a big tub, much to our embarrassment, as we were really old enough to wash ourselves but not to Mum's satisfaction.

We had guinea pigs, rabbits, cats and dogs and a pet seagull. One very sad episode was when a little kitten jumped out of the fireplace just after mum had lit it for washing. We managed to catch it and although badly burned, it survived.

Apparently it went into the ashes for warmth. However, about one month later mum was raking the ashes and found the skull of the little kitten so it must have gone in there again. I don't know whether it was burnt to death or if it went back for warmth and died before the next washday.

Cliff and I joined the Long Bay swimming and athletics club in our very early years. We had lots of fun and really looked forward to our races every Sunday.

Long Bay was such a pretty beach but when the north-easterly wind came up it blew all the raw sewage into the Bay as the sewerage outlet was just out from the headland.

Many was the time when we swam amongst dead kittens and puppies and white grease on the water was inches thick. We would have to go home and wash ourselves all over with hot soapy water to get rid of the grease and smell, but worse than that, the beach would be lined with hundreds of condoms washed up on the shore. It is a wonder we ever survived to adulthood. It certainly would not be allowed today. There were periodical health checks of the water but it was never condemned as this only happened when the nor'easter blew.

I've so many happy memories of my childhood it's hard to recall them all. I absolutely idolised Cliff and I know he felt the same for me.

This is an edited extract of Dot's story in "From Long Bay to Malabar - A village by the sea" by Patrick Kennedy published in 2009.

Malabar Beach in the 1950s.

What's on

June to July 2022

YOUR STREET YOUR PARTY

Coogee Bay Road, Coogee
Saturday 4 June
10am – 6pm

The Spot, Randwick
Sunday 5 June
10am – 6pm
Free
