<b>Progress Report</b>	<b>8</b>

## Explanatory notes

This progress report is split into two tables:

**Table A:** Tracks progress in delivering the outcomes of the 2022- 32 Community Strategic Plan

**Table B:** Tracks performance in providing the ongoing services required by our community and our compliance with regulatory obligations.

Performance is measured against the target value and target trend for each indicator.

*Note: Table B also includes contextual numbers. These are used to understand demand and resourcing requirements; and/or to calculate indicators. Contextual numbers are not performance indicators as they do not have target values or target trends.*

### Target value

For each indicator, there is a target value. This is either:

- The target value of the indicator on a specific date (date indicator); OR
- The target value to be achieved over a set period (period indicator).

Some indicators have target values that are the same for each quarter. These are typically indicators that set standards for performance such the percentage of requests responded to within SLA timeframes.

Other indicators do not have targets for each quarter, rather they have one target value that must be reached by the end of the target period. These are typically date indicators or cumulative (YTD) period indicators.

The following table provides a summary of how performance is tracked against target values:

Performance tracking against target value	Description
 Achieved	Target value was achieved
 Not completed <sup>1</sup>	Project or activity was not completed by the target date
 Not achieved	Target value was not achieved.
 n/a	No target value OR value not available for quarter.

Notes:

1. Projects or activities that were not completed by the end of the financial year 2022-23. The majority of these have been carried over into the 2023-24 Operational Plan and Budget.

## Target trend

In addition to target values, most indicators also have a target trend to either increase or decrease. By comparing the current quarter results with the previous quarter, it is simple to determine whether the target trend is being achieved.

Whilst measurement against the target value is a key indicator of performance, measurement against the target trend is also a useful tool for monitoring progress and improvement. Some target values are stretch goals and may take some time to achieve. In these circumstances the trend will help determine whether performance is improving (despite the target value not being achieved) and identify any areas where additional support may be required to keep performance/progress on track.

The following table provides a summary of how performance is tracked against target trend:

Performance tracking against target trend	Description
 Achieved	Target trend was achieved when comparing current result with the previous quarter.
 No change <sup>1</sup>	Current result is identical to the previous quarter.
 Not achieved	Trend was in opposite direction to target trend when comparing current result with the previous quarter.
 n/a	Activity completed OR no target trend OR trend cannot be determined as the previous (and/or current) quarter value has not been provided.

Notes:

1. In the progress report, quarterly performance tracking for indicators where the current result is identical to the previous quarter will show 'No change' for the trend and an orange light with 'Not achieved' in the performance tracking column.

B39.1.2 Develop and implement opportunities for community input into the Council's decision-making processes, including through formal consultations, social media and biennial community satisfaction surveys.	Indicator: <i>BI289</i> Number of engaged participants on YourSay Randwick	Manager Communications					Comment: More than 2,000 people engaged on Council's Your Say Randwick platform over the quarter. 'Engaged' means they actively took part in an online consultation by completing a survey, putting a pin on a map or taking part in a forum. For the year to date this figure is almost 6,000 participants. The overall number of participants engaging on a project is not a measure of success. The number of participants will vary depending on the topic of the consultation, level of impact and location. Also more participants may represent some degree of dissatisfaction as it's human nature to take part more in engagement when people are opposed to something. This figure shows that Council's engagement activities are being used, but what is more important to consider is the consultation mediums being used, the notification of affected communities, the phrasing of clear information, and the willingness of Council to use community feedback to change and improve its projects.
